

EECE 157: Math Lab II

The purpose of this course is to further develop students' problem solving skills, improve their understanding of the calculus techniques and concepts they learn in Math 157 (Calculus II), and help them see how calculus can be used to solve engineering problems. Topics include: integration techniques, applications of integration, polar functions and parametric functions, sequences and series.

Credits: 1

Prerequisites/Permissions:

MATH 156, MATH 157. Offered Fall and Spring Semesters.

Program:

Electrical Engineering
